Overview

Overview of the LED SearchLight with Built-In Laser Pointer for DJI Mavic Pro and Mavic Pro Platinum

Revolutionary innovative design that perfectly fits your DJI Mavic Pro and Mavic Pro Platinum drones.

Combine the LED Searchlight with Built-In Laser Pointer with Drone-Sky-Hook Release & Drop PLUS devices to enhance your DJI Drone night flight experience and see places in a different light at night!

Multiple Searchlight ON/OFF Control modes to best suit your application:
- Simple drone rotation (Self-contained. No linkage to the drone’s front LED light is required).
- Use of C1 or C2 button on the DJI drone remote controller or DJI App (Linkage to the drone’s front LED light is provided).
- Manual control.

Connect-And-Fly in seconds! No modification of any kind to the drone is required! No tools needed!

Quick Mounting and Locking Systems (QMLS). Perfectly fit the DJI Mavic Pro and Mavic Pro Platinum drones.

Sensors Interference Avoidance System (SIAS). Will not interfere with the operation of the DJI Mavic Pro and Mavic Pro Platinum VPS sensors.

Unlimited operation range.

Small and light weight. Weighs only 8 oz (230 grams). Allows you to lift additional payload.

Can be rotated to shine its bright light forward, downward in angles or straight down. Illuminate your DJI drone takeoff / landing area or other areas during your flight.

Over One hour of continuous operation on a single battery charge.

Built-in rechargeable battery and USB Charger. Can be charged from any 5V/1A mobile phone charger, USB jack on computers/Laptops or car battery.

Robust design. High quality aluminum and 3D printed lightweight ABS.

Note: Do not overload your drone with heavy or bulky payloads that it cannot safely carry.
Applications

Applications for the LED SearchLight with Built-In Laser Pointer for DJI Mavic Pro and Mavic Pro Platinum

Use the Quick Mount Drone-Sky-Hook Release & Drop PLUS combined with the LED Searchlight with Built-In Laser Pointer to mark and illuminate points of interest on the ground.

Easily spot your DJI drone at night by using the Quick Mount Drone-Sky-Hook Release & Drop PLUS combined with the LED Searchlight with Built-In Laser Pointer. Have a better view of your DJI drone’s position and orientation in the air under low light conditions or total darkness. Use the Searchlight as landing light during takeoff and landing.

Fish at night with the Drone-Sky-Hook Release & Drop PLUS combined with the LED Searchlight with Built-In Laser Pointer so you can lure the fish to the light while having a better view of your DJI drone’s position and orientation in the air.

Search for a lost or missing person at night using the Quick Mount Drone-Sky-Hook Release & Drop PLUS combined with the LED Searchlight with Built-In Laser Pointer. Enhance the view of your search area with this powerful searchlight that shines bright light at night on objects as far as 330 feet (100 meter) away!

Before takeoff, rotate your LED Searchlight with Built-In Laser Pointer to shine its bright light forward, downward in angles or straight down. Illuminate your DJI drone takeoff / landing area or other areas during your flight. This powerful searchlight beam illuminates objects as far as 330 feet (100 meter) away!

Drone-Sky-Hook Release & Drop PLUS devices are required to control the LED Searchlight with Built-In Laser Pointer.

Drone Sky Hook strongly recommends that you follow all laws and regulations in your area, closely check your surroundings prior to takeoff and keep away from civilians, properties, trees, buildings electric poles etc.

Drone Sky Hook shall not be responsible and assume no liability for any loss, damage or injury.

IMPORTANT NOTE: Do not overload your DJI drone with heavy or bulky payloads that it cannot safely carry.
Installation

Please click on the following links to watch the installation instructions videos:
Installing the Drone-Sky-Hook LED SearchLight with Laser Pointer for DJI Mavic Pro and Mavic Pro Platinum: https://youtu.be/nOF0XaSzA5o

Installation of Drone-Sky-Hook LED SearchLight with Built-In Laser Pointer for DJI Mavic Pro and Mavic Pro Platinum

Remove the original landing gear feet

Install the extended landing gear feet (provided)
Correctly orient the Release & Drop PLUS Device with the SearchLight mounting plate as shown.

Observe the correct orientation of the Release & Drop PLUS Device and insert it into the SearchLight mounting plate as shown. The Release & Drop PLUS Device should tightly fit into the existing holes and slots of the SearchLight mounting plate.
Verify the correct installation of the Release & Drop PLUS Device on the SearchLight mounting plate as shown. The Release & Drop PLUS Device should tightly fit into the existing holes and slots of the SearchLight mounting plate.

Locate the SearchLight battery plug. It is a polarized connector with a locking tab. Observe the plug’s orientation and plug it into the AUX jack on the Release & Drop PLUS Device. The plug should be locked to the AUX jack.

Verify that the battery cable is away from the Drop Wheel as shown.
Remove the original landing gear feet that came with the Release & Drop PLUS Device

Install the extended landing gear feet (provided)
Slide the complete assembly (Release & Drop PLUS Device with the SearchLight) into the front slots of the Mavic’s heatsink.

Spread the rear sides of the Release & Drop PLUS Device with your fingers and insert them into both holes of the Mavic's landing gear.
Lock down the Release & Drop PLUS Device rear rotating bracket until it locks in place.

Lock down the coiled cable holder into the Release & Drop PLUS Device rear rotating bracket.
Route the Light Sensor cable under the SearchLight mounting plate and orient the cable plug towards its jack located on the Release & Drop PLUS Device.

Firmly plug the Light Sensor cable plug into its jack located on the Release & Drop PLUS Device. Verify that the plug is inserted all the way into its jack.
Operation

Battery Charging of the Drone-Sky-Hook LED SearchLight with Built-In Laser Pointer for DJI Mavic Pro and Mavic Pro Platinum

Charging

Plug the provided USB cable to the Searchlight batteries box. Connect the other end of this cable to a standard 5V / 1A USB charger (like a mobile phone charger or other 5V / 1A charger. The specified charger output current should be no less than 1A and no more than 2.1A).

Charge the Searchlight batteries overnight (12 hours) for maximum battery capacity. IMPORTANT: Disconnect it from the charger after 12 hours.

Do not charge the batteries when the ambient temperature is below 32 degrees Fahrenheit (0 degrees Celsius) or above 104 degrees Fahrenheit (40 degrees Celsius).

Charging the SearchLight batteries during storage

Verify that the Searchlight is completely turned OFF and the Red light on its batteries box is OFF. This will prevent continuous battery drain due to the Searchlight’s standby current.

To completely turn OFF the Searchlight and prevent continuous battery drain, verify that the AUX Channel is ON and then turn OFF the Searchlight by pressing its pushbutton multiple times until the Red light on its batteries box turns OFF.

NOTE: The Searchlight draws standby current from its batteries even when the AUX Channel is OFF. Follow this procedure to completely turn OFF the Searchlight and prevent continuous battery drain.

Charge the Searchlight batteries overnight (12 hours) every 4-6 months to maintain maximum battery capacity. IMPORTANT: Disconnect it from the charger after 12 hours.

Do not charge the batteries when the ambient temperature is below 32 degrees Fahrenheit (0 degrees Celsius) or above 104 degrees Fahrenheit (40 degrees Celsius).
Operation

Please click on the following link to watch the use of the drone Remote Controller C1/C2 button to control and set the Drop Wheel and Searchlight. These videos are applicable for Mavic Pro, Mavic Pro Platinum, Phantom 4 and Phantom 3 together with Drone Sky Hook Release & Drop PLUS models only and a SearchLight.

Operation of the LED SearchLight with Built-In Laser Pointer for DJI Mavic Pro and Mavic Pro Platinum

Connect the Searchlight to the AUX Channel jack on the Release and Drop PLUS device.

Turn ON the AUX Channel and then select the Searchlight desired light output mode by pressing the Searchlight pushbutton multiple times.

When the Searchlight is turned ON, the Red light on its batteries box will be illuminated.

See operation video in the product support page.

At the end of the Searchlight operation you must completely turn OFF the Searchlight to prevent continuous battery drain. Verify that the AUX Channel is ON and then turn OFF the Searchlight by pressing its pushbutton multiple times until the Red light on its batteries box turns OFF.

NOTE: The Searchlight draws standby current from its batteries even when the AUX Channel is OFF. Follow this procedure to completely turn OFF the Searchlight and prevent continuous battery drain.

Press the SearchLight pushbutton to turn it On or Off and to change the SearchLight operation modes.

Press the pushbutton multiple times to select the desired operation mode or function.
SearchLight operation modes

Before takeoff loosen the rotation knob, rotate your LED Searchlight to the desired angle and tighten the rotation knob.
Operation

Drone-Sky-Hook Release & Drop Device (PLUS models only) – Control Modes of the AUX Channel to Turn the SearchLight On or Off

**DSH Models:** Single Release & Drop PLUS / Dual Release & Drop PLUS

**Operation Mode 1 – Drone Rotation**

<table>
<thead>
<tr>
<th>Remote Controller (Mode 2)</th>
<th>Operation</th>
